

SkyTech Billing

Billing that reaches new heights

User Guide & Demo Walkthrough · Version 0.1.0

by SkyTech Developments
robin@skytechdevelopments.com · +91 76318 69625

1. What is SkyTech Billing?

SkyTech Billing is an offline, Windows desktop application for GST billing and inventory management — built for distributors and suppliers (e.g. selling to schools & colleges). All data is stored locally on the user's PC; no internet is required for daily use.

Highlights

- GST invoices, proforma, delivery challans, orders and returns — with PDF export.
- Inventory with live stock, valuation, low-stock alerts and adjustments.
- Purchases (PO → GRN → returns), Sales, and Payments with bill allocation.
- Reports: dashboard, receivables aging, sales register, Profit & Loss, GST summary + CSV export.
- Role-based access, audit log, automatic & manual backups.
- 14-day free trial, then a machine-bound license you activate.

2. Installation & first run

Step 1. Run `SkyTech-Billing-Setup-0.1.0.exe`. If Windows shows "Windows protected your PC", click **More info** → **Run anyway** (the app is safe; this appears for software that isn't code-signed yet).

Step 2. On first launch you create the first account.

Field	Example
Full name	Ritwik Singh
Username	admin
Email	you@yourbusiness.com
Password	SkyTech@123

Step 3. After creating the account you'll see a one-time **recovery code** (e.g. `KUYK-AW9G-2D63-GX3C`). **Write it down** — it's the only way to reset your password if you forget it (offline app, so there's no email reset).

For SkyTech (vendor) only: click **Advanced setup** and enter your private **vendor setup code** to create a **Super Admin**. Customers leave this blank and become **Admin** (full business control, but not Super Admin). Keep the code secret.

Passwords & account recovery

- **Change password / edit profile:** click your name (top-right) → My profile / Change password.
- **Forgot password:** on the sign-in screen click **Forgot password?**, enter your username and recovery code, set a new password (you'll get a fresh recovery code).
- **New staff:** when an admin creates a user, that user is asked to set their own password at first login.
- **Admin reset:** an Admin/Super Admin can reset any staff member's password from the Users page.

3. Roles & access

Role	Who	Can do
Super Admin	SkyTech (you)	Everything + reserved vendor controls. Created only with the setup code.
Admin	Customer's owner	Full business, manage staff users, activate the license. Cannot create Super Admins.
Manager	Senior staff	Operate + financial reports + approvals.
Operator	Data-entry staff	Day-to-day billing, stock and payments only.

The menu and buttons automatically change based on the signed-in user's role.

4. Licensing & activation

Every install starts with a **14-day free trial** — all features unlocked. After 14 days the app locks to an activation screen until a license key is entered.

How a customer activates

1. Open **License** (or the activation screen) and copy the **Machine ID**.
2. Send it to SkyTech with payment: **robin@skytechdevelopments.com** / **+91 76318 69625**.
3. SkyTech sends back a key; paste it and click **Activate**. Works offline, instantly.

The key is **bound to that one computer** and cannot be reused elsewhere. Only SkyTech can create keys (they are cryptographically signed) — customers can only activate.

Moving to a new PC (transfer)

On the old PC: **License** → **Deactivate this device** → note the confirmation code and send it to SkyTech. On the new PC: install, **restore your backup** (below), then activate the new key.

Issuing keys (SkyTech only)

Run the admin portal: `npm run portal` → open `http://localhost:8787` → paste the customer's Machine ID → choose validity → generate the key.

5. Page-by-page reference

Dashboard

At-a-glance KPIs (sales this month, receivables, low-stock, unpaid invoices), a **6-month sales trend chart**, recent invoices and a low-stock list. Light & dark themes.

Items

Your products/services master: SKU, name, HSN/SAC, unit, GST rate, purchase & selling price, opening stock and reorder level. Low stock is flagged automatically.

Clients & Vendors

Two tabs. Clients are your customers (schools/colleges); Vendors are suppliers. Stores GSTIN, addresses, contact, credit limit/days and opening balance — with on-entry validation of GSTIN/PAN/phone/email. Each row shows the **live outstanding balance** (Dr = owes you, Cr = you owe), and the ☐ button opens a full **Statement of Account** (running balance) you can export to PDF.

Inventory

Live stock, total stock value and low-stock count, plus a **Batch expiry** view (batch-wise remaining stock with nearest expiry, flagged when expiring within 90 days). **Adjust stock** for damage, expiry or physical-count corrections. Capture batch no + expiry on purchase (GRN) and sale lines.

Purchases

Purchase Orders, **GRN** (Goods Received — increases stock) and Purchase Returns. Convert a PO to a GRN in one click.

Sales

Invoices, Proforma, Delivery Challan, Sales Orders and Returns. Live GST totals (CGST/SGST or IGST), line + invoice-level discounts, additional charges (freight/packing), due dates, and rounding. PDF invoices include an **HSN/SAC summary** and a **UPI "scan to pay" QR code**. One-click **Share on WhatsApp**, convert Order/Proforma → Invoice, and a **credit-limit warning** when a customer exceeds their limit. Date-range filters on every list.

Payments

Record receipts (from clients) and payments (to vendors), then allocate them to specific bills. Invoice status updates to Paid/Partial automatically.

Reports

Receivables aging, **Payment Reminders** (overdue invoices with one-click WhatsApp reminder), Sales Register, **Profit & Loss** (COGS at weighted-average cost), **GST Summary** (+CSV), **GSTR-3B** outward-supply summary, and **HSN-wise** summary. Invoices also export **e-Invoice JSON** (IRP schema) and **e-Way bill JSON**, and print as A4 or **80mm thermal receipt**.

Users

Create and manage staff accounts and their roles (with safeguards: can't remove the last admin, etc.).

License

View status/expiry/Machine ID, activate a key, or deactivate to transfer.

Settings

Company profile + **logo** (shown on invoices), bank/UPI details, invoice paper size, prevent-negative-stock toggle, and **backup/restore + automatic backups**.

Help & Support

App version & license, your **Machine ID**, SkyTech contact (email / phone / WhatsApp), and shortcuts to open your **data & backups folder** and **logs folder**.

6. Guided demo (copy-paste this data)

Follow in order to see the full flow end-to-end.

A. Settings → Company profile

Field	Value
Legal name	Acme School Supplies Pvt Ltd
GSTIN / State code	07AABCA1234A1Z5 / 07
City / State	New Delhi / Delhi
Bank / UPI	HDFC Bank, A/C 50100123456789, IFSC HDFC0000123 / acme@hdfcbank

Upload any PNG/JPG as the **logo** — it will appear on invoices.

B. Items (add these)

SKU	Name	HSN	GST	Purchase ₹	Selling ₹	Opening stock	Opening value ₹
NB-A4-200	A4 Notebook 200 Pages	4820	12%	35	60	500	17500
PEN-BL-10	Blue Gel Pen (Pack of 10)	9608	18%	45	80	300	13500
GEO-BOX	Geometry Box	9017	18%	90	150	100	9000

C. Clients & Vendors

Type	Name	GSTIN	City / State code	Credit
Client	Delhi Public School, R.K. Puram	07AAACD1234F1Z2	New Delhi / 07	₹2,00,000 / 30 days
Vendor	National Paper Mills	06AAACN9999P1Z4	Gurgaon / 06	15 days

D. Purchase → GRN (brings stock in)

Vendor **National Paper Mills**, tick **Inter-state** (Haryana≠Delhi → IGST). Lines: A4 Notebook ×1000 @35 (12%), Blue Gel Pen ×500 @45 (18%). Save.

E. Sales → Invoice

Client **Delhi Public School** (intra-state → CGST+SGST). Lines: A4 Notebook ×200 @60 (12%), Blue Gel Pen ×100 @80 (18%), Geometry Box ×50 @150 (18%).

Expected totals: **Subtotal ₹27,500 · CGST ₹2,115 · SGST ₹2,115 · Grand ₹31,730**. Save, then click the download icon to get the branded PDF invoice.

F. Payment → Receipt

Receipts tab → client Delhi Public School → amount **31730** → mode UPI → **Auto-allocate** → Save. The invoice now shows **Paid**.

G. Explore Reports

Dashboard shows the sale & KPIs. Reports → **Profit & Loss** shows Revenue ₹27,500, COGS and Gross Profit. Reports → **GST Summary** → **Export CSV** for filing.

H. Users

Add staff: e.g. `riya` (Operator), `amit` (Manager). Sign in as each to see role-based menus.

7. Complete feature list

Billing documents

- Tax Invoice (GST), Proforma Invoice, Delivery Challan, Sales Order, Sales Return / Credit Note
- Purchase Order, Goods Received Note (GRN), Purchase Return / Debit Note
- One-click conversion: Order/Proforma → Invoice, PO → GRN
- Auto, gapless, financial-year-wise numbering (e.g. INV/2025-26/0001)
- Line discounts, invoice-level extra charges & discount, auto round-off, amount-in-words
- Intra-state CGST+SGST or inter-state IGST (auto by state code), multiple GST rates per invoice
- Batch number & expiry per line

Printing & sharing

- Branded A4 PDF (company logo, bank details, UPI QR, HSN summary, terms)
- 80mm thermal/POS receipt
- Share on WhatsApp; e-Invoice JSON (IRP schema) & e-Way bill JSON export

Inventory

- Live stock & valuation (weighted-average cost), low-stock alerts, reorder levels
- Stock adjustments (damage / expiry / count), opening stock, batch-wise expiry report
- Optional "prevent negative stock" guard

Parties, payments & money

- Clients & vendors with GSTIN/PAN validation, credit limits, opening balance
- Live outstanding balance + full Statement of Account (PDF) per party
- Receipts & payments with allocation to bills; partial/paid tracking
- Payment reminders for overdue invoices (one-click WhatsApp)

Reports

- Dashboard KPIs + 6-month sales trend chart
- Receivables aging, Sales Register, Profit & Loss (with COGS)
- GST: GSTR-1 (CSV), GSTR-3B summary, HSN-wise summary

Security, licensing & data

- Role-based access (Super Admin / Admin / Manager / Operator), audit log
- Password recovery code, forced first-login password change, account lockout
- 14-day trial → machine-bound offline license activation; deactivate/transfer
- Manual + automatic daily backups; one-click restore; light & dark themes

8. Backup, restore & data safety

All data is stored locally, so backups are important.

- **Manual backup:** Settings → Backup & restore → **Create backup...** (save to USB / cloud-synced folder).
- **Automatic backups:** pick a folder under **Automatic daily backups** — the app keeps the latest 10.
- **Restore:** Settings → **Restore from backup...** → pick the file → app restarts with that data.
- **New PC:** backup on the old PC → install on the new PC → restore → deactivate the old license and activate the new key.

9. Support

SkyTech Developments — we issue licenses and help with setup.
